Gaisar Davletkildin

Senior Frontend Developer

I'm Gaisar, a frontend developer with 7 years of experience specializing in React, TypeScript and ReactNative. I have deep knowledge in designing and developing web application architecture, creating and optimizing component libraries. My experience also includes working with testing tools (Jest, Storybook) and supporting high-performance applications.

I've successfully launched numerous projects spanning various technologies, demonstrating my adaptability and versatility in delivering high-quality solutions. Currently, I'm leading the development of a CRM system.

As an individual, I pride myself on being responsible, open-minded, and honest. I would be pleased to offer my skills and experience to your projects. Thank you!

Experience

06.2023 - Present

Senior Frontend Developer | AdTech Holding

- Developed a CRM system using React and Material-UI (MUI) to enhance manager-client interactions and task management.
- Led the team in creating UI components, including building libraries and optimizing component performance.
- Refactored legacy components to improve performance, resulting in a 20% reduction in load time.
- Developed the application's architecture, improving scalability and speeding up the development of new features.

07.2021 - 06.2023

Senior Frontend Developer | Beeline

- Developed web applications for employees and candidates, including a system for requesting vacations, sick leaves, and business trips.
- Created a UI component library (UI-kit) using React and TypeScript, improving consistency and speeding up the development of new interfaces.
- Conducted code reviews and mentored developers in the "beeintern" frontend developer courses at Beeline.

05.2019 - 07.2021

Middle Fullstack Developer | Sberbank

- Played a key role in developing two major projects: an online banking platform for business clients and a CRM system for client managers.
- Implemented a dashboard module in the main application and integrated telephony into the CRM.
- Designed the application architecture and created a component library to standardize code.

03.2017 - 05.2019

Frontend Developer | OnPoint

- Designed and developed captivating CLM (Closed Loop Marketing) web-presentations enriched with animation and gamification elements
- Created web games optimized for tablet devices
- Created animated presentations and surveys
- Collaborating closely with clients to discuss design solutions
- Documenting software and technical specifications to maintain clarity
